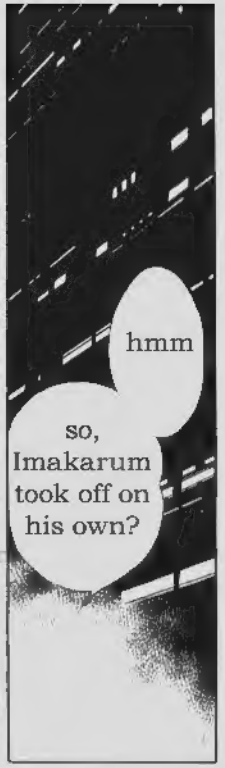
Deal with this, Imakarum...
fulfill your mission!

Yes..
apparently he has located the hiding place of the Guyver.



hmm
so, Imakarum took off on his own?

Let him go.
He left with the Enzyme Threes without saying a word.

All his actions are motivated by Archanfel alone.
Imakarum is acting on the direct orders of Archanfel!

Under-stood

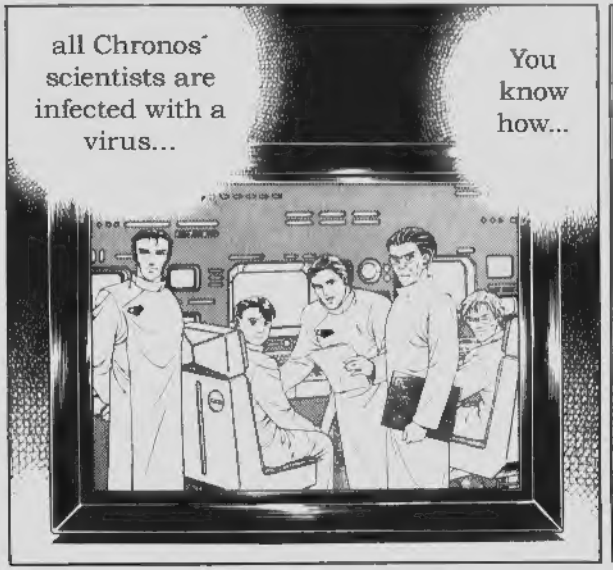
Torii and the others bought me a last chance...
Especially after...

Then... all the others..

paying for it with their lives.



all Chronos' scientists are infected with a virus...
You know how...

yes, they died.

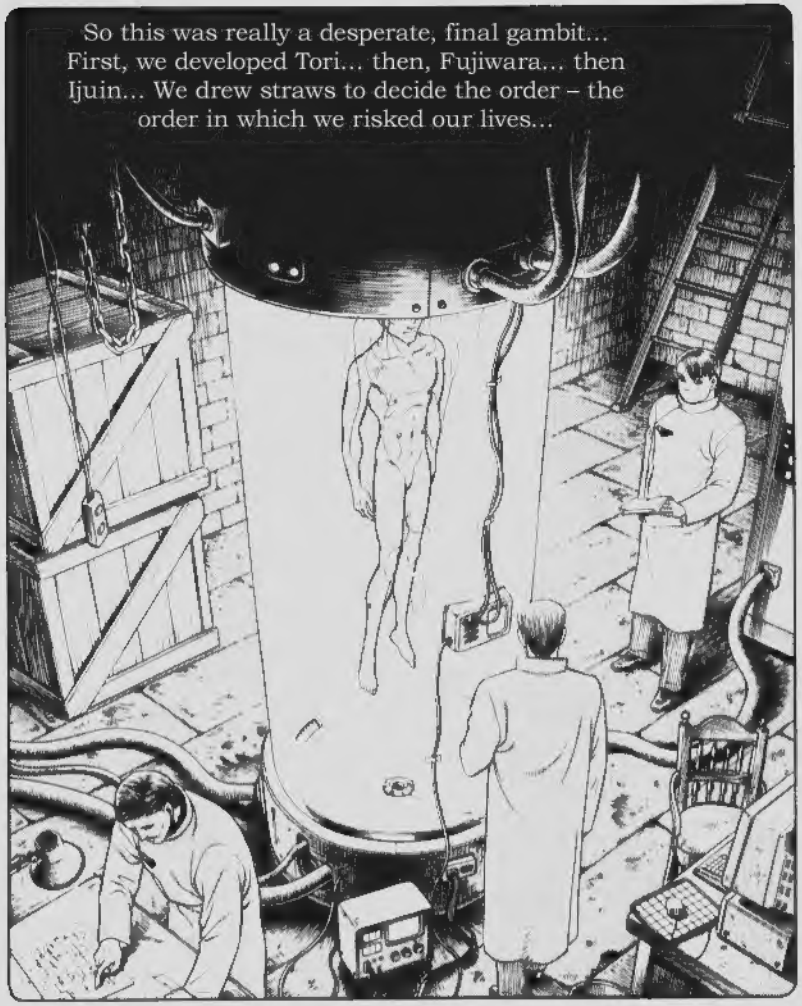
to prevent escape or betrayal
that destroys the brain unless antibodies are periodicially injected

But we discovered an unexpected way out...

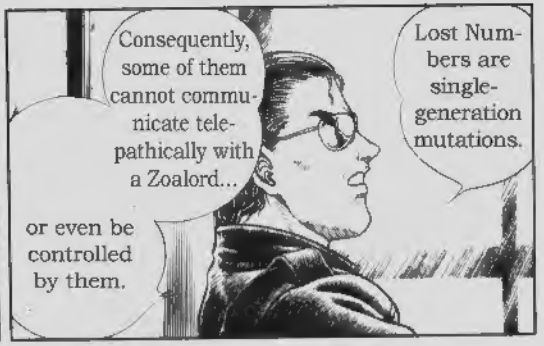
There is only one way to destroy the virus altogether... To be processed.
But this would at the same time make one genetically loyal to Chronos.

A way out?

to become Lost Numbers.



So this was really a desperate, final gambit... First, we developed Tori... then, Fujiwara... then Ijuin... We drew straws to decide the order – the order in which we risked our lives...



Consequently, some of them cannot communicate telepathically with a Zoalord...
or even be controlled by them.
Lost Numbers are single-generation mutations.

But that also means to intentionally force a failed processing...
and the probability of surviving that development is very low.

Four of them. Do they think they can take us on their own?

No! Behind them – more... But this feeling...

Shit! Guyver .

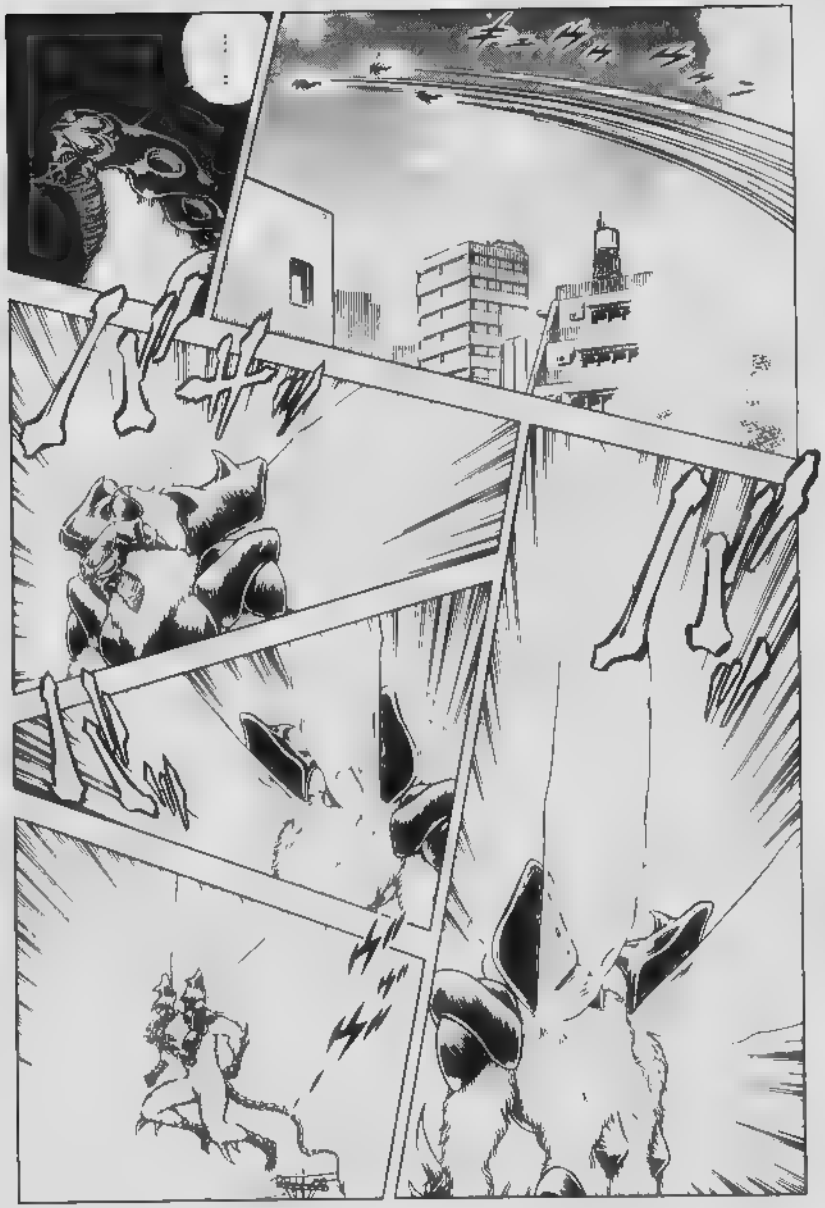
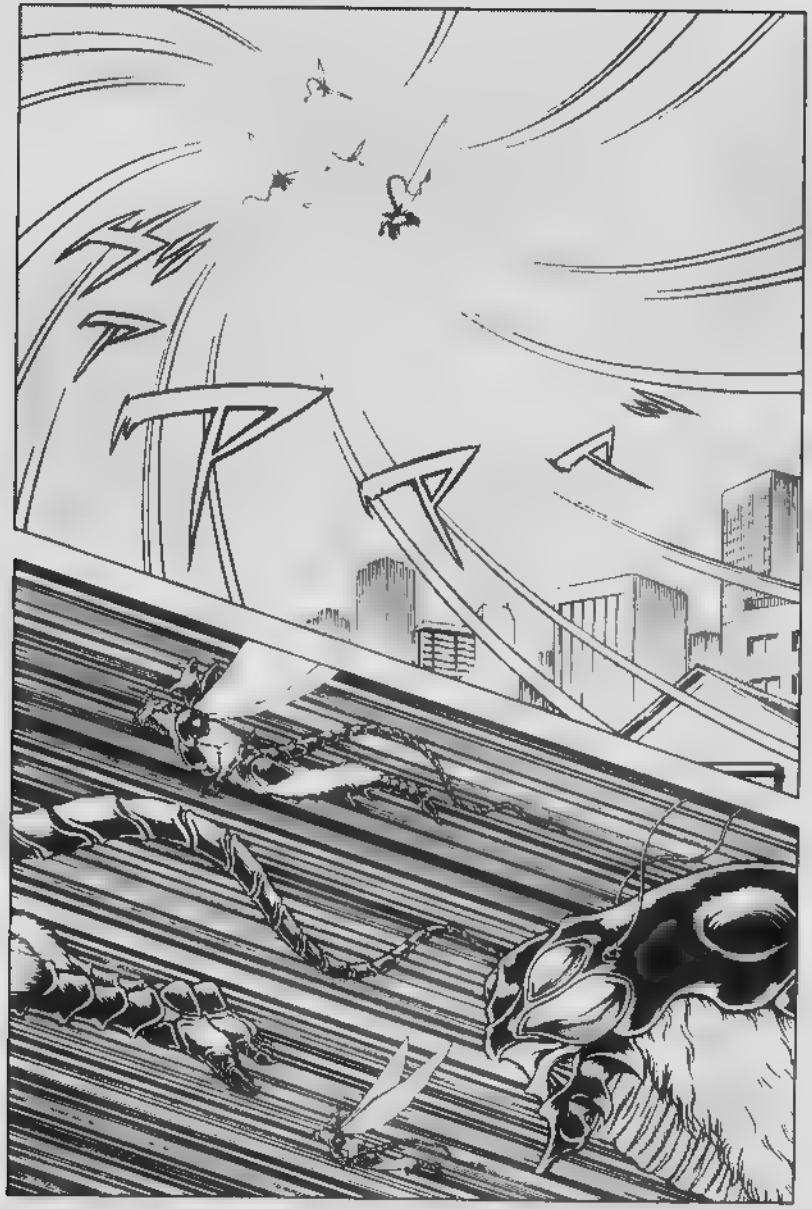
!!

There were other people living there!
the apartment building.

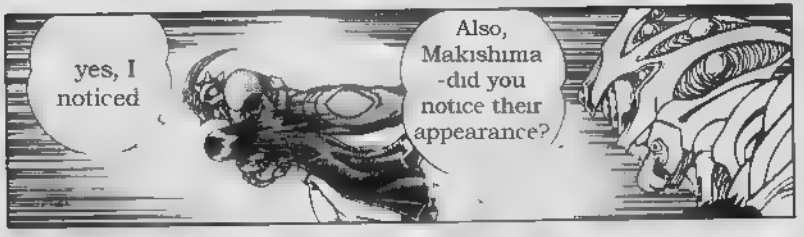




I have to get away from here if we're going to make it...

I can't fight like this,
while I'm carrying Tetsuro and the others...

they can fly, as well?
They're following us...



yes, I noticed
Also, Makishima -did you notice their appearance?

What? A new Enzyme that can fly?
it looks an awful lot like those accursed Enzyme Two's!
Curse you, Chronos...
Where is this going to end?

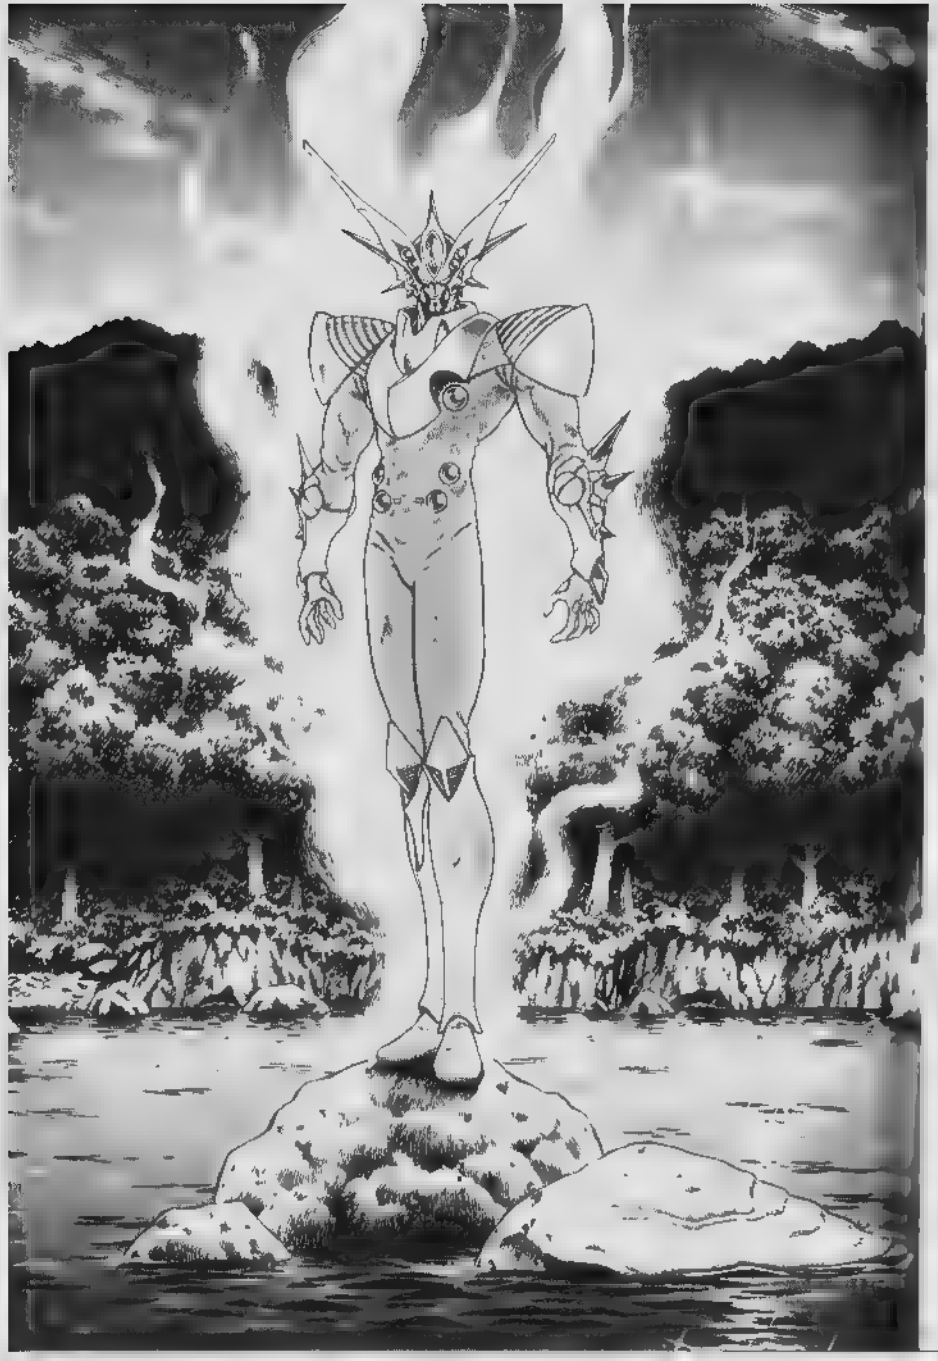
Tetsuro!
Brother?!

You have no hope. I know you too well...
You thought to get away? Poor deluded things...

We need to scatter!
I can't raise a shield in time!

Fuka machi?!
Tetsuro, are you okay?!
Uhh...
Tetsuro!

Tetsuro
!!



Tet-
suro!
I'm
ok..
Tetsuro,
are you
all right?

Aww,
Tetsuro
is still
alive, is
he?
!!

So nostalgic, like a Mount Minakami reunion...
I can't believe how many of you have survived...

Some girl I have never met .
Mr. Onuma ...
Shizu ..
Mizuki .

They died for the oath they swore to Dr. Odagiri!
They are dead!
I see...
And.... Hayami ?
Where are the others?

Mr. Murakami ..

Let's get this party started!!
Then let us begin.. THE DANCE OF DEATH!

Tetsuro,
!!

I wish to fight with you!
Sho!
take the others and run!

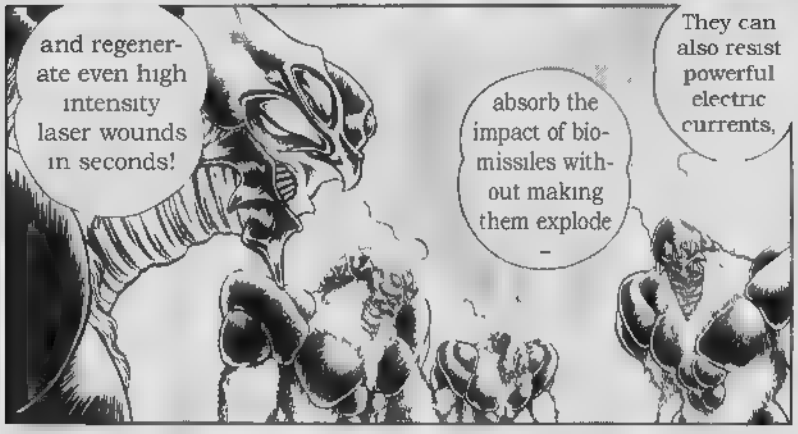
Of course,
they all are.
Aptom -
Go.
You would be a liability

You concern yourself with that Zoalord!
I can deal with those Enzyme Threes on my own...

You won't escape!!
But I wiped them out in 30 seconds!
They may be Guyver's natural predator .
!?

They're not exploding?
Behind you, Aptom!
!!
What the--? They can withstand a million volts??

Enzyme Three isn't merely the Guyver s natural predator...
Why do you look so surprised?



and regenerate even high intensity laser wounds in seconds!
absorb the impact of bio-missiles without making them explode -
They can also resist powerful electric currents,

called. .
Aptom!
Their defensive systems were specially developed to stand up to the battle creature..

!?

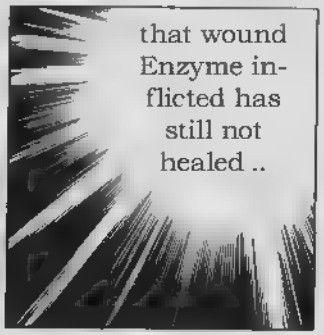
But then.. how...

!
What?

!!
Uhh
...

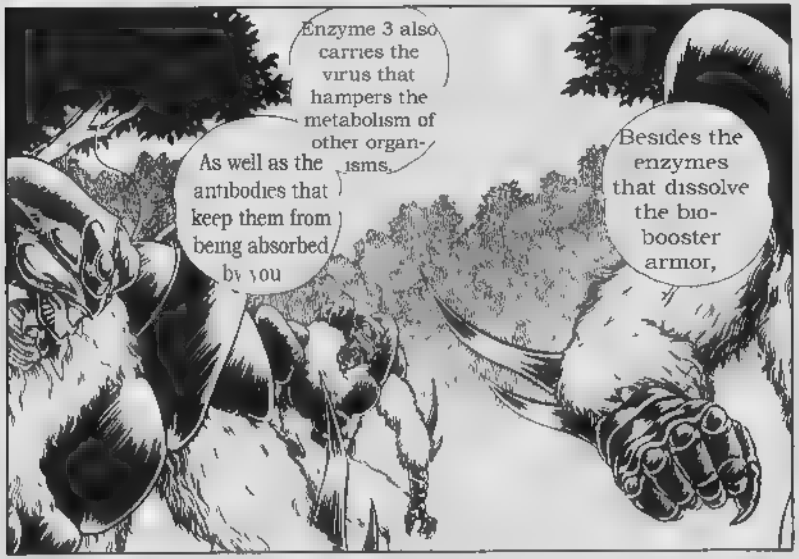
These abilities are possible because of their specially altered metabolism
which is dozens of times faster than that of a normal zoanoid!
Unfortunately, they can only survive two or three years because of this...

could it be...?



that wound Enzyme inflicted has still not healed ..

You are finally beginning to under stand!

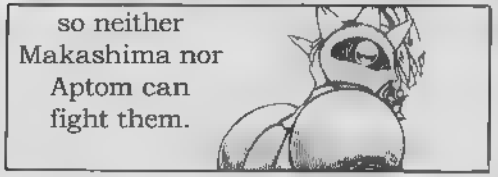


Enzyme 3 also carries the virus that hampers the metabolism of other organisms,
As well as the antibodies that keep them from being absorbed by you
Besides the enzymes that dissolve the bio-booster armor,

Him .!
Just like Neo ZX-Tole!

Now do you see?
Enzyme Three is not only the natural enemy of the Guyver
but now, you as well, Aptom!

Damn ...

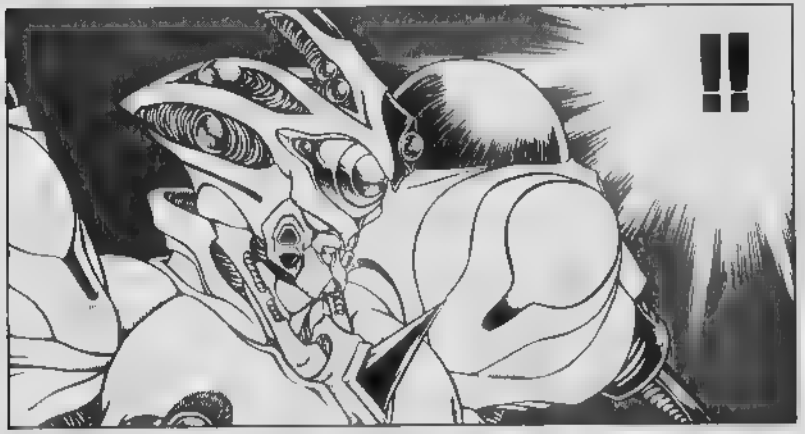


so neither Makashima nor Aptom can fight them.

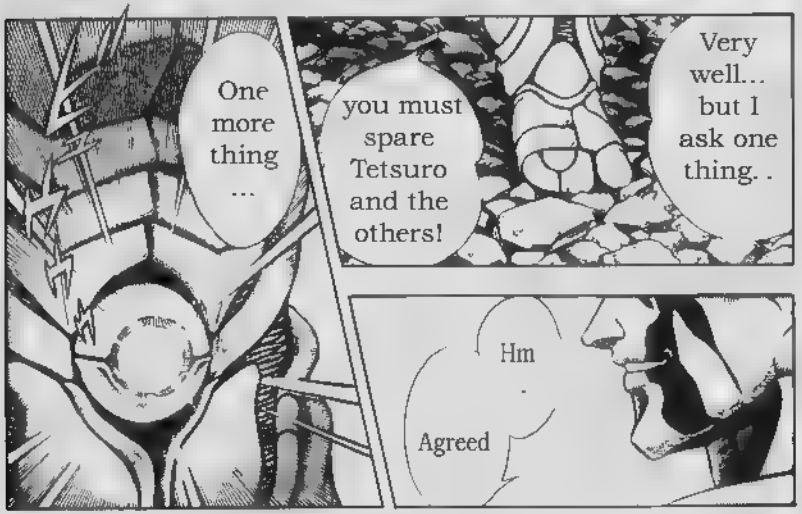
Blast it...

We can only count on the Gigantic Guyver...

It is your task to battle me!
Well then Sho!

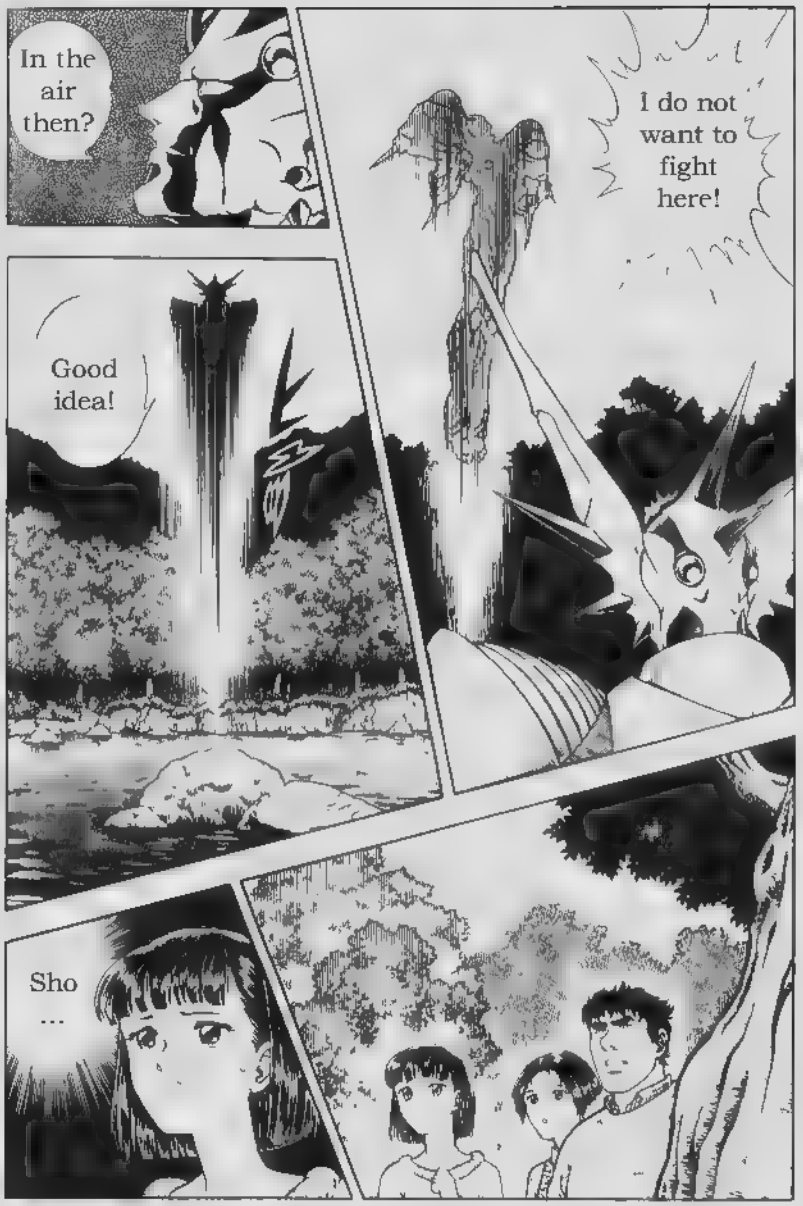


!!



One more thing ...
you must spare Tetsuro and the others!
Very well... but I ask one thing..
Hm
Agreed

Now I have to fight -
To save my friends, and to save the world from Chronos. I have no option but to fight!



In the air then?
I do not want to fight here!
Good idea!
Sho ...

That isn't Murakami any more.
Wake up, Sho!
I'll rip the control medal right out of you!
Well?
Are you already resigned to defeat?

Heh, heh all resis tance is useless...
You still see Murakami in me, you won t engage me
EH, Sho?
Sho..

You are the last hope...
It´s up to you now, Sho...
!!
To make it so that my death
so that my death was not in vain!
Mr. Murakami!

Imakarum

I will

you !!

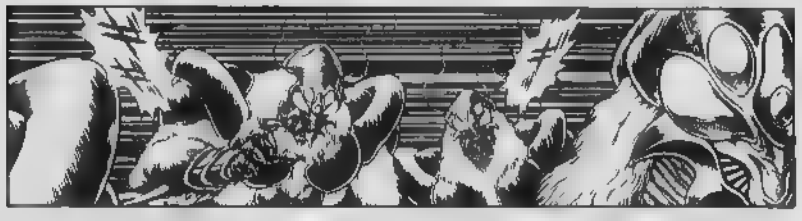
I will try to draw their attention.

If this fight goes on for much longer, we're as good as finished!
You've seen how much our weapons affect them...
Aptom?!

I won't be able to fire more than one blast for now!
True... but we would have only one chance

Okay then, get ready.
Just leave it to me.
Don't worry, I have no intention of dying here with you today.
Tsk!

GO!!
Set..



They followed me as planned
Great

Just come and get me you bastards!!
Right, stop here!

What's Aptom planning to do?
!?

USE IT!!
Ugh... Now, Guyver Three!

Are you serious ?!

But how you were able to defend yourself from the Megasmasher?
Although, not in the best shape...
Heh... I'm fine
But I can generate an EM arc-blade that effectively split the blast field of the smasher!
I may not be able to create a full shield like a Zoalord, or the Gigantic...
But ..
possessed...
survive it.
I couldn't create an arc blade that was large enough.
That's why I'm cut up like this.
It took a lot out of me to fight the Enzymes.

Young master!

We barely beat them... I'm not as injured as Aptom is, but I expended a lot of energy.. If another enemy were to appear now...

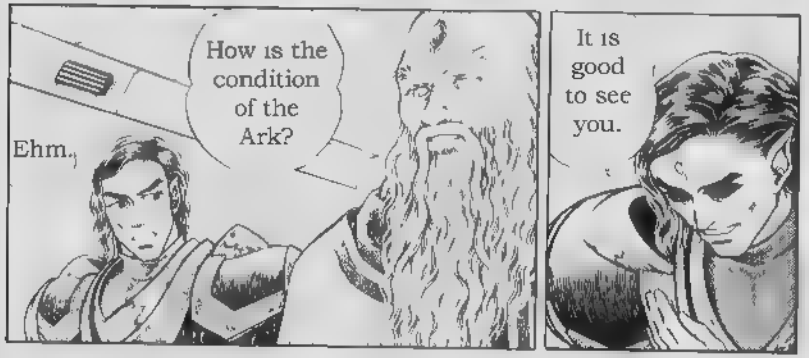
Yes, Thank you Dr Barcas.
Did you have a pleasant journey, Shin?



How is the condition of the Ark?
Ehm.,
It is good to see you.

The passenger is his excellency Shin Rubeo Amniculus!
and has landed in the amniotic pool.
The shuttle pod has arrived from the Ark.

I cannot reveal the secret of the island Silha, neither to you nor to Pulukshter!
The island on which, hundreds of years ago, I first met him..

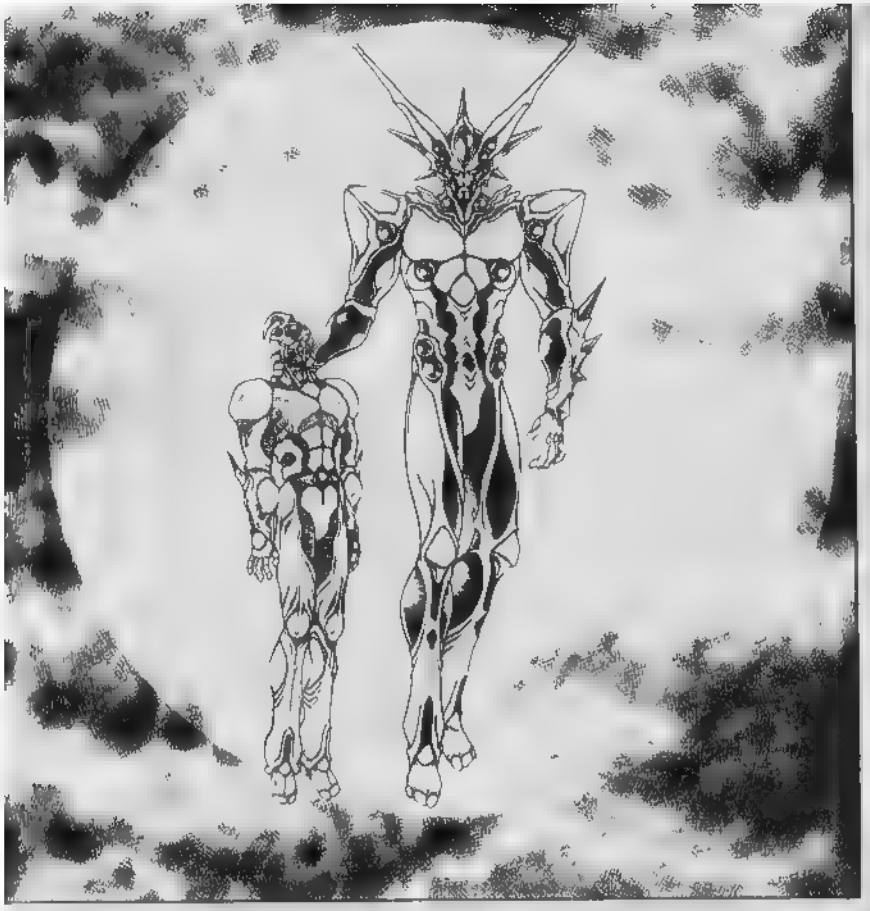
Hmm yes.
that will take a lot of time.
Of course we still have to select the crew...

Lord Archanfel will be pleased as well.
we have made giant strides in the Ark project...
In any case, thanks to the living cells from the Mount Minakami Relic,

I am sorry, Shin

so where is our lord at this moment?

it is sometimes difficult to keep track of him...
I do not know ..



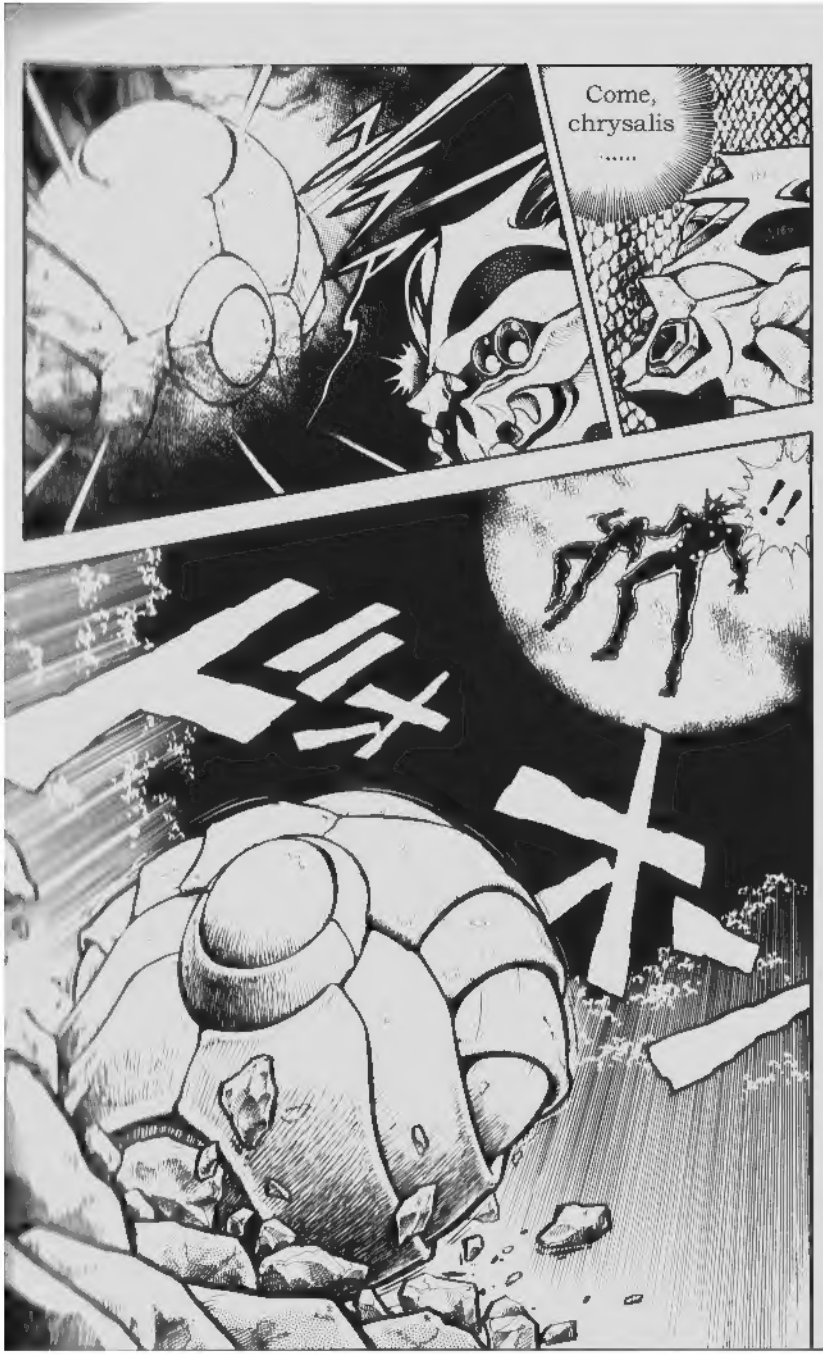
Sho...?!

Fukamachi!
The Gigantic was defeated?
Impossible!
Regard-less.
I didn't think you could defeat all four Enzymes..
I doubt you have enough power left to fight me as well!
Heh, heh ...

Guyver Advocacy

Allow him to think you are still unconscious.
Wait!
but... I would not enjoy dispatching you so easily
Now I could easily erase you all from existence...
Murakami!
And so...
Answer me, Fuka-machi
How could the Gigantic be defeated?
I am sorry, Makishima ...
But I...
I will tear Guyver One's control medal out before your eyes.

Guyver Advocacy



Come, chrysalis .....
